

Freedom means
always to answer “Are we there yet?”
with “Yes”.

Caravans 2011 | Sport | Südwind | Südwind Exclusive | Deseo | Lifestyle

Freedom is ...

... the ultimate feeling. To leave everything behind and to have only one breathtaking feeling in the most beautiful time of the year: To be free to do whatever you want.

Freedom 2011

Freedom is ...
as individual as we
humans are.

"And the others will just be sitting
down for their meal at the hotel."

"I reckon people actually only want two things in
life: Love and freedom."

"Everybody wants freedom. I've found it."

"Being somewhere different every day but still waking up in your own bed – that's what I call Freedom!"

"You can't just find freedom anywhere. You have to bring it with you."

"Where paradise is? Wherever we happen to be!"

"At last it's me saying where we go!"

"That's how free we were then. This is how free we are now."

Transformation artists.

(Transformation) miracles repeatedly occur in the Deseo!

For example, seat boxes change into mobile stowage boxes or into an open-air seating group. For optimal room use all the stowage, seating, and lying elements are of a multi-functional design in the Deseo. Winter

Hibernating – no way

Knaus caravans are excellently prepared for the cold season.

They guarantee safe driving characteristics and cosy living comfort. With insulating side walls in sandwich design, powerful heating systems, and optimised furniture construction for best-possible room air circulation. In all the Knaus caravan ranges not only the seating groups, but also the top cabinets have a clearance to the side walls to achieve continuous air circulation from floor to ceiling. This creates a "forced air circulation" that results in fast and uniform heating of the room air without any cold bridges and without any formation of condensation water.

With various additional components such as electric floor heating or ALDE hot water heating system that are available in special winter packages or also individually, winter comfort can be further improved as desired.

Frost-resistant water hoses

Keeping the furniture away from the side walls ensures excellent air circulation to prevent condensation.
